Rigid Grid Bolted Stringer

### Floor Height (mm):

500

## Project Description

GSK Asia House is a purpose built 6-storey development for the pharmaceutical company's business in Asia. The development consists of a variety of work spaces, meeting venues and recreational spaces.

In order to accommodate the highly agile workforce, a comprehensive access floor system is required to provide flexibility in the reconfiguration of the workspaces as well as ease of access to services. Our access floor system is able to provide a high performance solution for the client in achieving its objective of creating a smart and modern environment for its employees.
